

UI/UX DESIGN

Project 4

Industrial Training Kit

Batch: 2026 | Powered by DecodeLabs

WELCOME TO THE TEAM! 🚀

Step into the role of an Interaction Designer at DecodeLabs. Project 4 is your motion phase: The Living Prototype. This track isn't about "still images"—it's about Feel and Flow. Before you hand off to developers, you must master the Pulse of the user journey through transitions and button clicks. By completing this milestone, you are proving you can bridge the gap between design and reality through pure logic and micro-interactions. Let's design a digital experience that reacts with absolute precision.

Project 4: THE LIVING PROTOTYPE ⚡

SCENARIO:

Your design is ready, but the stakeholders can't "feel" how it works. They want to see the transitions, button clicks, and the overall flow before they send it to the developers.

YOUR MISSION:

Breathe life into your static designs using Interactions. Connect all 3 screens using Prototyping links. Add Micro-interactions: (e.g., Button hover effects, smooth page transitions).

Outcome: A clickable link that looks and acts like a real app.

Tools: Figma (Prototype Mode), etc.

Delivering Health at the Speed of Life

Green Grocer App:
Interaction Design & Prototyping

Project: UX/UI Intern Capstone

The Strategy of the Happy Path

Optimizing the 'Sunny Day Scenario' for maximum conversion efficiency

Engineering the Dopamine Loop

Building trust through immediate system response

Designing for the One-Handed User

Optimizing the 'Thumb Zone' for effortless interaction

Accessibility Standard:
44pt Touch Targets.

The Figma Prototyping Toolkit

- Smart Animate
- Interactive Components
- Overlays

Technical Challenge: The Native-Feel Carousel

Frictionless Conversion

Speed over Data Collection →

The UX Audit Checklist

From Pixel to Physical Reality

Validation via Figma Mirror

We don't just design screens; we design behavior.

CONCLUSION

The absolute best way to master UI/UX design is through hands-on practice, not just theory. Don't just aim to complete these projects; take them one by one, experiment with unique solutions, and treat every design challenge as a learning opportunity. As you build these milestones at DecodeLabs, you are creating a real-world portfolio that showcases your logic and craft to future employers. Your journey to becoming a professional designer begins right here, right now, with the very first pixel you place and every user journey you simplify today.

THANK YOU
